

**ASX ANNOUNCEMENT/MEDIA RELEASE**  
**July 25, 2011****COKAL CONTINUES TO ATTRACT TOP QUALITY TECHNICAL PROFESSIONALS**

Global coal group Cokal Limited (ASX-CKA) has announced the appointment of additional senior staff members to join its highly experienced coal exploration team.

Cokal, headquartered in Brisbane, has prospective coking coal projects in Central Kalimantan, Indonesia, and recently announced a joint venture to explore for coal in East Africa.

Cokal Executive Chairman Peter Lynch said the company has recruited Tri Yoso from Riversdale Mining to take on the role of Senior Resource Geologist. Mr Yoso has been the author and Competent Person responsible for the compilation of the Coal Resource reporting in accordance with the JORC Code and ASX listing rules for Riversdale's Benga and Zambese coking coal projects in Mozambique.

Previously, Mr Yoso was employed by PT Berau Coal in the role of senior geologist responsible for exploration and mine geology duties. PT Berau Coal, located in East Kalimantan, Indonesia, produces 20 million tonne per annum of coal to the Asian export markets.

In 2005, Tri Yoso joined SRK Consulting in Brisbane as a senior coal geologist where he was responsible for planning and supervising coal exploration projects in Mongolia, Australia and Indonesia. He was also responsible for the compilation of JORC Code Resource reports for many SRK clients in China, Mongolia, Mozambique, Australia and Indonesia.

More recently, in his role at Riversdale, he was a key member of the exploration team responsible for delineating 13 Billion tonnes of coal for Riversdale, comprised of export coking and thermal coal products. He helped supervise the exploration activities in Mozambique to ensure the reliability of borehole data as required by the JORC Code in determining the coal tonnage and coal quality estimations.

Peter Lynch said the skills that Tri Yoso brings to Cokal are vital in ensuring the efficient acquisition of reliable coal data from our Indonesian and East African projects for establishing Resource estimates in accordance with our ASX commitments.

Mr Tius Sinyal has been recruited from PT Sumber Alam Bagus Energi to take on the role of Forestry Liaison/Geologist at Cokal's Indonesian concession areas. Mr Sinyal's previous achievements include implementation of exploration permits, forestry permits and approvals of RKAB. Mr Sinyal was also responsible for administration and appraisals prepared for the various Mines & Energy regulatory departments and will be involved in aspects of feasibility studies, planning, cost efficiency and relationships with the local communities and governments.

"These appointments represent a serious increase in our capabilities," he said.

"We are finding a lot of interest from professionals within the coal industry who would like to be part of what promises to be a dynamic enterprise based on positive and agile decision making."

---

Cokal has interests in four exploration projects in Central Kalimantan considered prospective for metallurgical coal. Recently released initial exploration results confirmed high quality metallurgical coal at the BBM project.

Cokal has recently announced it has signed a co-operation agreement with the Mozambique Government owned company EMEM Empresa Moçambicana de Exploração Mineira (EMEM – Mozambique Mining Exploration Company) to, explore tenements in Mozambique for coal mining potential and jointly develop mines and associated facilities.

Cokal has commenced drilling activity on its 50% owned Manda project in Tanzania.
